RESUME

AKASH KUMAR PASWAN

ELECTRONIC ENGINEER

About Me

Hello, I'm Akash, an electronic engineer passionate about creating innovative solutions. Skilled in Robotics, Embedded Systems, programming, circuit design etc, I enjoy designing electronic systems that solve real-world problems. I am committed to keeping up with the newest technology trends and am excited to use my skills on important projects.

 +918755954409

 Akashpassi99@gmail.com

 R. K. PURAM, TARLAADHOIWALA, DEHRADUN

EDUCATION

Govt. Polytechnic DehraDun
Pittuwala, Dehradun
Diploma In Electronic Engineer

Mahadev Pvt. Industrial Training Institute (ITI)
Perupur, laksar road, Haridwar
Electrician trade

Shri Guru Ram Rai Public School
Sansdhara road, dehradun
High School in CBSE board

PROJECTS

AI ROBOTIC ARM

- Developed an AI-powered robotic arm for precise object manipulation and recognition.

3D-PRINTER

- Designed and built a compact 3D printer with high print quality and speed for prototyping purposes.

IOT HOME AUTOMATION

- Developed an IoT-based system to automate home devices for convenience and energy efficiency.

BOTS

- **Line Follower Robot:** "Engineered a robot that autonomously follows lines using smart sensors."
- **Obstacle Avoidance Robot:** "Developed a robot with obstacle avoidance capabilities for navigating complex environments."
- **Mobile Control Robot:** "Created a mobile-controlled robot for versatile remote operation."

App

- **EMPTX –** Employee Performance & Attendance Tracking App: Developed an Android app using Flutter for employee management, attendance tracking, and KPI-based performance monitoring.

TECHNICAL SKILLS

Electronics Engineer

- Electronics Engineering with strong fundamentals in Analog & Digital Circuits
- PCB Design & Circuit Layout (Analog & Digital)
- Embedded Systems & IoT Applications
- Knowledge of Robotics and Automation Systems
- Sensor Interfacing & Microcontroller Programming (ATmega2560, ATmega328P, ATtiny85, ESP32, ESP8266)
- Electronic Circuit Troubleshooting & Debugging

Programming & Automation

- Python (Data Analysis, AI-based defect detection prototype, automation scripting)
- C Programming (Embedded logic development, memory handling)
- Microcontroller-based hardware control & integration

Machine Learning & AI

- Machine Learning Fundamentals (Supervised Learning, Classification Models)
- Convolutional Neural Networks (CNN) for defect detection
- Image-based Defect Detection Model Development
- Data Preprocessing & Model Training

Quality Engineering & Problem Solving

- Root Cause Analysis (RCA) & CAPA Implementation
- 7 QC Tools & 8D Problem Solving Methodology
- PFMEA, Control Plan & Risk Mitigation
- PDCA Cycle for Continuous Improvement
- 5S, Kaizen & Poka-Yoke Implementation

Process & Auditing:

- Process Audit, Product Audit & Line Inspection
- Customer Complaint Handling & Corrective Action Reporting
- Defect Trend Monitoring & Process Stability Improvement

Leadership & Teamwork:

- Manpower Planning and Team Handling
- Operator Training and Skill Development
- Cross-Functional Coordination with PE, ME, FQC, and Production Teams

Software & Reporting:

- MS Excel (formulas, Pivot Tables, KPI dashboards, SPC charts)
- PowerPoint (Professional technical presentations)
- Python (Data analysis, AI-based defect detection prototype)
- Knowledge of C programming.
- 8D, PDCA, PFMEA, Control Plan documentation

CERTIFICATIONS & ACHIEVEMENTS

- Certificate of participation in Skill Enhancement on Electronics and Instrumentation.
- Certificate of Training in ROBOTICS.
- Certificate of participation in Artificial intelligence/ Machine learning for geo data analysis.
- Participation in Science And Technology Exibition.

WORK EXPERIENCE

Self-Employed (Freelance Electronics Projects)
2022 – 2024

- Worked independently on electronics-based automation and robotics projects.
- Designed custom PCBs and troubleshooting electronic circuits.
- Assisted local clients in developing prototype systems using embedded platforms.

Asst. Team Leader – Quality Assurance | ATL Battery Technology Pvt. Ltd., Bawal, Haryana
AUG 2024 – Present

- Manage daily manpower planning — assign work to operators and make sure all lines run smoothly.
- Shift management according to production plan to Achieve daily Targets.
- Conduct CFT alignment and resolve the issues.
- Take Block Action immediately when any defect or abnormality is found to prevent defective cells from continuing in the process.
- Handling costumer audit in internal plants and provide closers for any issues.
- Train and guide operators to help them identify defects and follow standard work procedures.
- Do daily line audits and inspections to make sure all SOPs and process parameters are followed.
- Prepare Prime Yield defect reports and analysis charts to monitor trends and identify improvement areas.
- Conduct IPQC process audits to ensure compliance with SOPs,control plans, and quality standards.
- Perform machine audits to verify equipment condition, calibration status, and process readiness.
- Verify critical process parameters (SPC, MES, machine parameters) to ensure product quality and process stability.
- Monitor Statistical Process Control (SPC) charts and investigate abnormal trends to prevent quality issues.
- Perform rework audits and verify reworked materials before release for production.
- Support New Product Introduction (NPI) activities and ensure smooth transition from NPI to Mass Production (MP).
- Perform First Article Inspection (FAI) and process validation during model change overs.
- Conduct instrument calibration verification and daily instrument spot checks.
- Monitor electrolyte replacement, water content,and chemical change records.
- Perform 5S audits and ensure compliance with workplace organization standards.
- Review MRB status, dynamic sampling, hold/release materials, and segregation activities.
- Track NCRs, ODS issues,and follow up with responsible departments for timely closure.
- Prepare daily quality reports,shift handover reports,and KPI monitoring reports.
- Coordinate with Production, ME, PE, and QA teams for root cause analysis and corrective actions.
- Participate in internal audits, risk management, and quality improvement projects

DECLARATION

I hereby declare that the information given above is true to the best of my knowledge and belief.

Place: Dehradun
